EcoSat Woody South Island

Title

EcoSat Woody

Creator

Landcare

Publisher

Landcare Research

Date

2004-01-01

Description

EcoSat woody is a basic landcover map of New Zealand from Landsat TM imagery at 15m resolution. Classes include water, bare ground, woody cover, herbaceous cover, and snow.

Source

EcoSat woody is a rule-based spectral classification of Landsat TM imagery standardised to spectral reflectance (using a 15m DEM).

Coverage

5950000 2472500 6760000 3005000

Format

ESRI binary grid
