Description

<DIV STYLE="text-align:Left;"><DIV><DIV><P>A 25m resolution grid of aspect in degrees north of south, for use as a regression variable for calculating BASE carrying capacity using Model 1where:</P><P>if aspect <= 180 then aspect180 = aspect</P><P>else if aspect > 180 then aspect180 = 360 - aspect</P><P>This aspect data is symmetrical around north-south, meaning east and west are considered equivalent (90 degrees) to avoid problems in regression where normal aspect values of 0 and 360 degrees both equal the same north.</P></DIV></DIV></DIV>
