## Mean Annual Soil Temperature (STYEAR)

### Title

ecr\_styear

### Creator

Landcare Research

### Description

A 25m grid of mean annual soil temperature at 30cm depth derived by regression analysis from 175 data loggers and NIWA standard climate stations recording soil temperature. This clipped version is provided for use as a regression variable for calculating the BASE carrying capacity. For use with Model 1.

### Coverage

-46.1465089823 167.573015843 -41.3594499884 174.265450935
