ecr\_vpdjan

Title  
ecr\_vpdjan

Description  
A 25m resolution grid of mean annual vapour pressure deficit derived from the Land Environment New Zealand underlying climate dataset at an original resolution of 100m. This grid was resampled to 25m by bilinear interpolation to have visually compatible resolution to other data sets being used in modelling of ECR BASE carrying capacity. For use with both Model 1 and Model 2.

Coverage  
-46.1465089823 167.573015843 -41.3594499884 174.265450935
