Smap New Zealand Soil Classification (Soil Order) - February 2018

Title
Smap New Zealand Soil Classification (Soil Order) - February 2018

Creator
Landcare Research

Date
2012-09-21

Description
There has been a change in the way the S-map is being made available to users. The S-map primary map layer of soil classes (i.e. delineated areas that are labelled with the soil family name) is no longer freely available to commercial users. Access to this data and associated soil attribute data for commercial use is by negotiation - please contact Graeme Anderson. This layer is a "dissolved" representation of the NZSC soil order for S-map previously available as a lookup table. It is available for non-commercial use under a creative commons licence (CC-BY-NC-ND). The New Zealand Soil Classification is described in Hewitt (2010) - Landcare Research Science Series No. 1.

Source
S-map builds on previous soil mapping by filling gaps with new mapping, and upgrading the information content and associated database to meet a new national standard.
